

ADI is a San Antonio, Texas based company, founded, owned and managed by Todd Hargroder, a quadriplegic of twenty years. ADI designs, manufactures and distributes cutting edge mobility products for the wheelchair mobility industry, and serves as a select distributor for high end mobility products, accessories and quality rehabilitation fitness equipment for the disabled individual. Each of these products is consistent with our mission to enhance the mobility, independence, and well-being of people with disabilities, by evaluating and addressing the root of problem in order to effect change and provide lasting solutions.

ADI's San Antonio facilities include design, fabrication, assembly and business offices. Our fabrication shop is readied with the necessary equipment required to take concept drawings and quickly fabricate prototypes, as well as manufacture finished product. Our assembly shop consists of clean, well-lit areas that house product assembly stations, with the inventory required to finalize product assembly. This area also houses final product cleaning, inspection, and packaging stations.

ADI is passionate about the need for a fusion of advanced technology from other industries into the wheelchair and wheelchair product design process. ADI works closely with the world's leading wheelchair design and manufacturing companies, universities and research laboratories in the development of advanced wheelchair technology and equipment.

ADI is the designer and manufacturer of revolutionary products for people with disabilities.
